

What is child protection?

- All of the adults at Freshfield think that keeping children safe, healthy and happy are important.
- At Freshfield, we respect all children and help protect and support them.
- We do our best to help children learn new things and get better at things they can already do.
- We teach children how to protect themselves and stay safe.

How will we protect children?

- We provide a safe nursery for children to learn in.
- We want to make sure that children stay safe, recognising things that are not safe, wherever they are.
- We think it is important for our children to know where to get help if they are worried or unhappy about something.

We encourage children to tell someone if:

- Anyone is being unkind, even if they are a grown up.
- Anyone says funny things that make them feel sad or upset.
- Anyone touches them and they don't want them to.
- Anyone hurts them.

If children need to talk – we listen.

- Children can talk to any adult in nursery. To help them feel as safe as possible, we support them to feel as comfortable to talk to any adult in school.

CHILDLINE – Available for all children if they need to talk.
